Subject index

Admissions procedures to medical schools: editorial 263
AIDS
  implications for medical education 488
  pharmacy students' attitudes to educational intervention 492
Alcohol dependent students, programme for treating 40
Ambiguity, coping by medical students 316
Anaesthesiology training, Royal College of Anaesthetists programme S2·38: Discussion 3: issues identified S2·44
Anatomy course, case-based 68
Anatomy, predicting performance, using antecedent academic criteria 200
Animal issues and ethics in US medical school education 517
Anxiety neurosis, assessing competence of GPs to diagnose 432
Art of medicine revisited 331
ASME Conference, London, April 1994, proceedings S2·1–47
Assessment, formative, student perspective 394
Attitudes, medical students
  effect of clinical years 307
  effects of cadaver dissection 290
  to computer education 501
Attitudes to teaching among teachers at a British medical school 213
Audit
  educational, of postgraduate medical education 220
  medical, need for teaching 323
  surgical, simple, aid to undergraduate curriculum development 74
  teaching to undergraduates improves both knowledge and attitudes 89 *abst*

Beer-Sheva perspective in selection of medical students 265
Behavioural sciences classroom demonstration project on unrealistic optimism 513

Cadaver dissection, effects on attitudes of medical students 290
Calman Report, Hospital Doctors: Training for the Future, 1993 S2·1–47
Cancer teaching, undergraduate, portfolio learning 79
Cardiff's medical curriculum, where are we now? 472 *abst*
Cardiopulmonary resuscitation in eight English regions, survey of educational interventions and preregistration house officers' opinions of training 94 *abst*
Career
  choices, determinants among women and men medical students and interns 361
  medical, development, and stress, learning to cope 18
  preference, and choice of practice locations by Saudi medical students 83
Change in medical education, detailed study of six medical schools 350
Chemically dependent medical students, programme for treating 40
Child health, student-initiated revision 132: erratum 262
Clinical performance examination, measurement characteristics: correspondence 167
Cognitive status of young hospital doctors after night duty 566
Communication skills
  and pain control, survey of educational interventions and pre-registration house officers' perceptions of training 90 *abst*
  in palliative care, development and modification of a rating scale 559
  reliability of consumer assessment, postgraduate family practice examination 146
  self-assessment and identification of needs 93 *abst*
Community-based learning in obstetrics for undergraduate medical students 116
Community-based medical education in India, heat and dust 89 *abst*
Community-based teaching
  summary of survey on current and proposed teaching in the community and in general practice in UK universities 95 *abst*
  undergraduate 312
Community and its health system, linking with the university 343
Community paediatrics, medical student appreciation 93 *abst*
Computer communication networks, Internet tools in the medical classroom 508
Computer education, attitudes and opinions of first-year medical students 501
Computer literacy programme, issues relating to introduction for medical and dental students 90 *abst*
Computer skills and attitudes to computer-aided learning among medical students 381
Continuing medical education
  in Europe, survey 333
  and self-assessment 91 *abst*
  and women's health 91 *abst*
Coping
  by medical students with uncertainties and ambiguities 316
  learning to cope. stress and medical career development, UK 18
  stress and health, enhancing well-being during medical school 8
Core course in medical statistics for medical students 59
Core curriculum, University of Dundee approach to core curriculum and special study modules 473 *abst*
Core and options planning in the King's curriculum 470 *abst*
Core plus options at Edinburgh 471 *abst*
Core plus options or special study modules, where do we stand? 160
Core and special study modules, modular approach for the first 3 years 471 *abst*
Curriculum
  change in Liverpool 472 *abst*
  development, undergraduate, simple surgical audit 74

medical
Cardiff, where are we now? 472 *abst*
years 1 and 2, developing new structures 92 *abst*

Death and dying, dealing with 136
Demographic and motivational factors, influence on performance in the medical course 107
Dermatology examination performance, wide variation between different teaching centres 301
Direct clinical examination, alternative assessment method of clinical psychiatry skills 120
Disability and rehabilitation, teaching to medical students 386
Disease prevention and health promotion, integration into curriculum 481
Drug addicted students, programme for treating 40
Drug misuse, pharmacy students' attitudes to educational intervention 492
Dundee, University of Dundee approach to core curriculum and special study modules 473 *abst*
Dying and death, dealing with 136

Edinburgh, core plus options 471 *abst*
